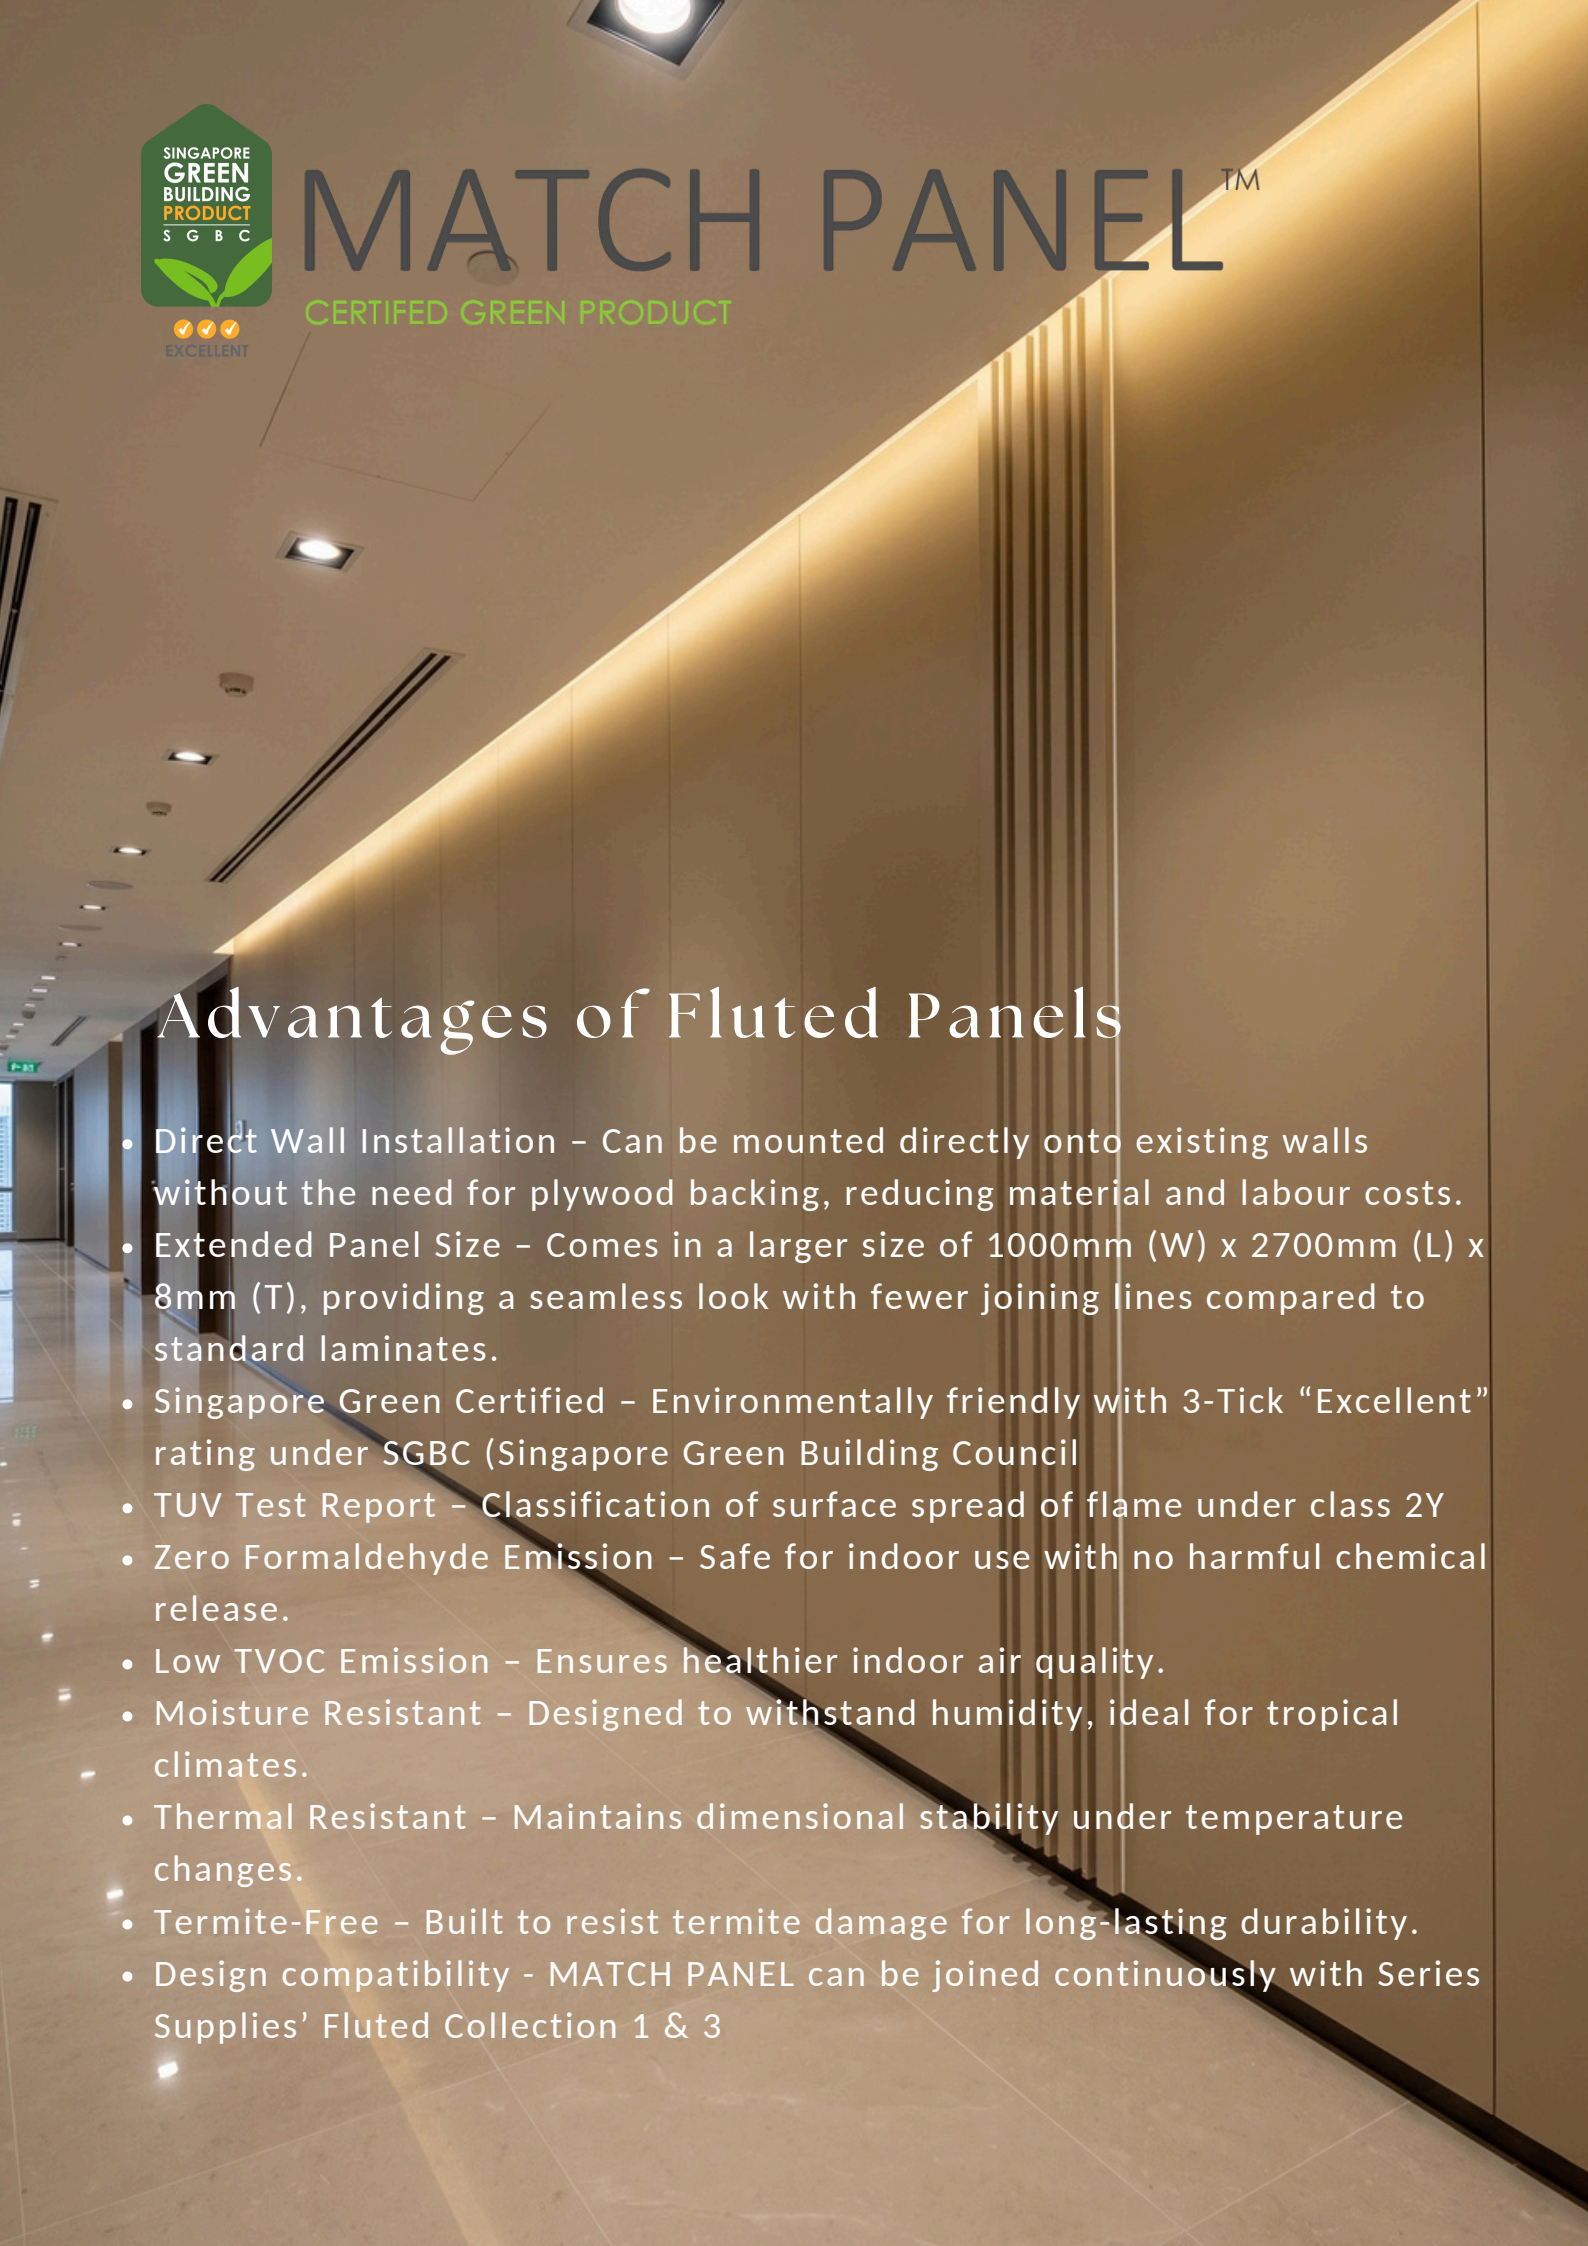
MATCH PANEL™

CERTIFED GREEN PRODUCT

Introducing the New MATCH PANEL from Series Supplies — Green-Certified and Cost-Saving Innovation

- Series Supplies proudly presents the new MATCH PANEL, a next-generation wall panel solution certified under the Green Singapore initiative. Designed for both sustainability and practicality, this panel redefines interior wall applications with its smart installation and efficient performance.
- Unlike traditional laminate systems that require plywood backing, the MATCH PANEL can be mounted directly onto existing walls, reducing material usage, labour time, and overall project cost. This makes it an ideal choice for designers and contractors seeking a more efficient and eco-friendly alternative.
- Another key advantage is its extended size of 1000mm (W) x 2700mm (L) x 8mm (T). With this longer length, MATCH PANEL eliminates unsightly joining lines commonly seen with standard laminates (typically only 2400mm long). This creates a seamless, elegant finish—perfect for HDBs, condominiums, and modern interiors that value clean aesthetics and sustainability.
- The new MATCH PANEL from Series Supplies is where eco-conscious design meets cost-effective innovation—a smarter, greener way to elevate any interior space.



MATCH PANEL™

CERTIFED GREEN PRODUCT

Advantages of Fluted Panels

- Direct Wall Installation – Can be mounted directly onto existing walls without the need for plywood backing, reducing material and labour costs.
- Extended Panel Size – Comes in a larger size of 1000mm (W) x 2700mm (L) x 8mm (T), providing a seamless look with fewer joining lines compared to standard laminates.
- Singapore Green Certified – Environmentally friendly with 3-Tick “Excellent” rating under SGBC (Singapore Green Building Council
- TUV Test Report – Classification of surface spread of flame under class 2Y
- Zero Formaldehyde Emission – Safe for indoor use with no harmful chemical release.
- Low TVOC Emission – Ensures healthier indoor air quality.
- Moisture Resistant – Designed to withstand humidity, ideal for tropical climates.
- Thermal Resistant – Maintains dimensional stability under temperature changes.
- Termite-Free – Built to resist termite damage for long-lasting durability.
- Design compatibility - MATCH PANEL can be joined continuously with Series Supplies’ Fluted Collection 1 & 3

MATCH PANEL™

CERTIFED GREEN PRODUCT

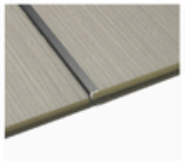
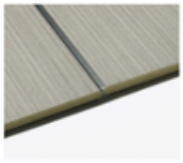
Introducing the MATCH PANEL Trimming System — Sleek Finishing with Black Aluminium Profiles

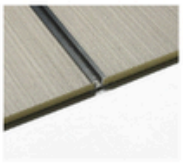
C-trim profile

T-trim profile

U-trim profile







Each aluminium profile comes in a length of 3000mm, allowing for flexible installation across various wall heights and design layouts. The matte black finish adds a refined contrast that highlights the panel design while maintaining a modern, cohesive look.

- **C Trim Profile** – For neat side or end finishing, providing a smooth edge detail.
- **T Trim Profile** – Ideal for joining two panels seamlessly in the same plane.
- **U Trim Profile** – Perfect for panel framing or edge protection applications.

Match Panel joint/connecting options

Characteristics:
ZERO formaldehyde emission
LOW TVOC emission
moisture resistant
thermal resistant

Physical & Mechanical Properties:
hardness: 71 HRR
modulus of rupture: 30 MPa
bending modulus: 2383 MPa
moisture content: 0.6%
water absorption expansion rate: 0.04%
resistance to screw withdrawal (surface):1505N
resistance to screw withdrawal (side): 1398N
Board density deviation: -0.1 %

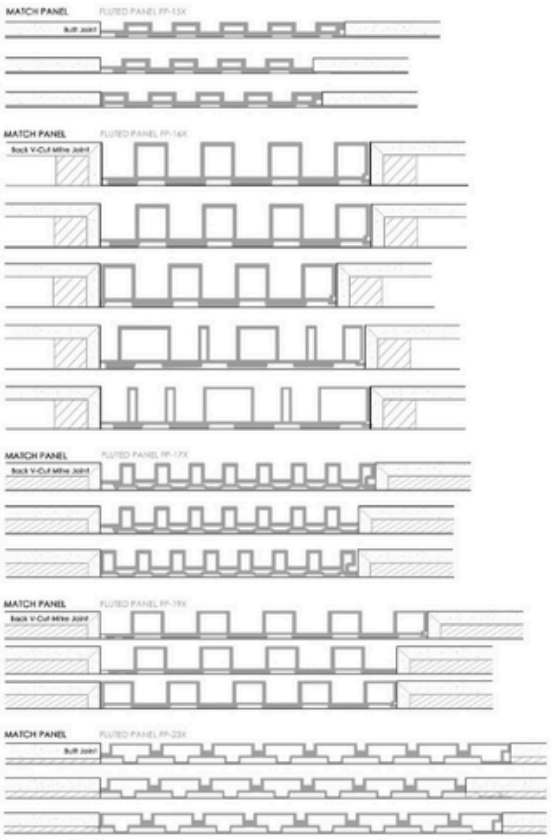
Fluted and Match Panel joint/connecting options



RESIDENTIAL APPLICATION

TV FEATURE WALL

Elevate your living room with our seamless match panels, creating a stunning, modern TV feature wall.

WALL PANELLING

Elevate your bedroom with seamless bedhead wall paneling. Match panels create a sleek, unified aesthetic, perfectly integrating vertical fluting and lighting for modern luxury.

SHOES CABINET DOOR

Elevate your entryway with bespoke match panels. Our integrated wood grain creates a seamless, sophisticated look for shoes cabinet doors. Durable and stylish, these panels offer a premium, clutter-free aesthetic.

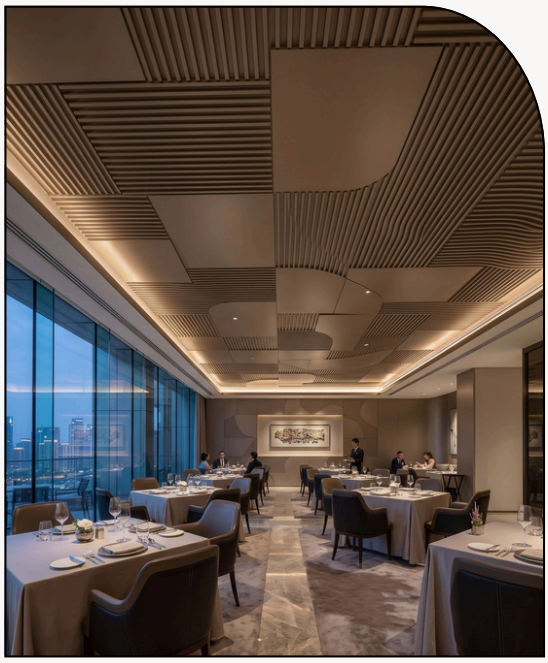
DECORATIVE CEILING PANEL

Transform your space with our match panels, creating a sophisticated decorative ceiling design.

COMMERCIAL APPLICATION

OFFICE WALL PANELLING

Elevate your living room with our seamless match panels, creating a stunning, modern TV feature wall.



RESTAURANT DECORATIVE CEILING

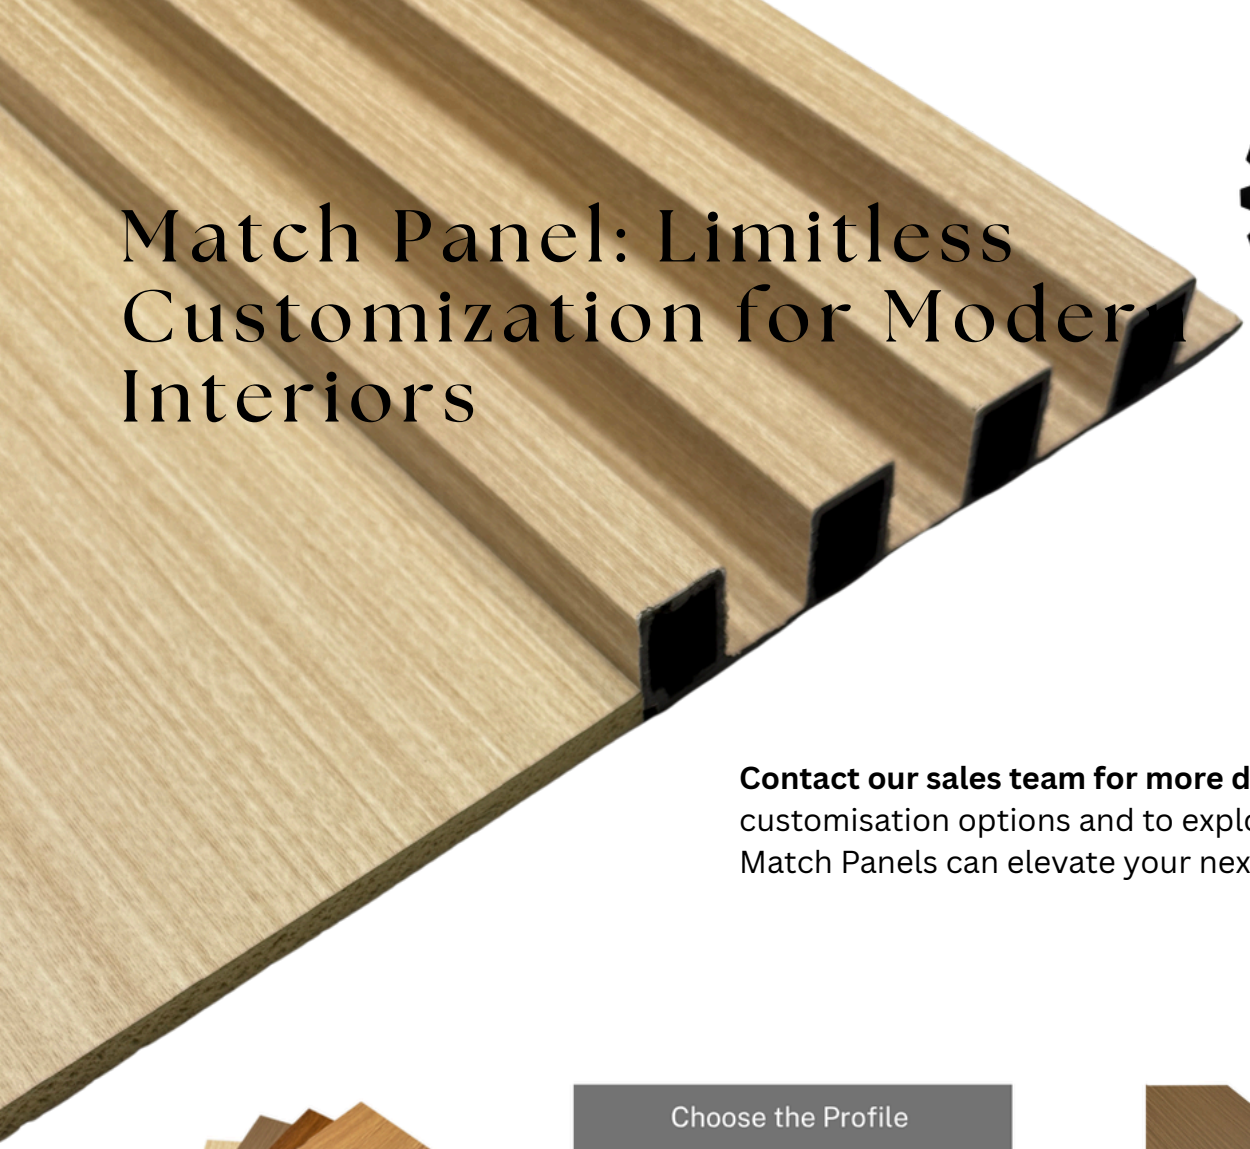
Elevate your dining atmosphere with stunning match panels, creating a breathtaking restaurant decorative ceiling.

SHOP FRONT WALL PANELLING

Elevate your retail facade with seamless Match Panel systems. This high-end boutique utilizes precise paneling, creating an ultra-modern, clean, and sophisticated shop front wall.

HOTEL BALLROOM WALL PANELLING

Enhance your grand space with seamless match panels, creating a breathtaking hotel ballroom wall.



Match Panel: Limitless Customization for Modern Interiors

Contact our sales team for more details on customisation options and to explore how our Match Panels can elevate your next project.

Choose Size and Thickness

Choose the Profile

Choose the colours or veneers

MATCH Panels can be fully customised with selected melamine finishes, made-to-order sizes, and groove line patterns tailored to any design concept. This flexibility allows architects and designers to create unique, branded, and visually striking feature walls perfectly suited for commercial interiors.

Introducing our Customised Match Panel, expertly crafted to meet diverse design needs with flexibility and precision. Available in a maximum size of W1200mm x L3000mm, and a thickness option of 5mm or 8mm, this panel offers the perfect solution for seamless large-format applications. Choose from selected edge joining profiles for a flawless connection, and finish your design with a wide selection of melamine veneer textures or custom colour finishes. Ideal for feature walls, wardrobe doors, and more—designed to match your vision perfectly.

CUSTOM MADE PANEL

Tailored Precision: Customized Match Panel Solutions

- While our standard Match Panel is available in a versatile 2700mm (H) × 1000mm (W) × 8mm (Thickness) format, we recognize that exceptional architectural concepts often call for bespoke dimensions and design details. To give you complete creative control, we offer full customization for Match Panels up to a maximum size of 3000mm (H) × 1200mm (W).
- Engineered to transform ordinary spaces into extraordinary statement pieces, MATCH Panels can be fully tailored to your project's exact requirements:
- Tailored Dimensions: Made-to-order sizing up to 3000mm × 1200mm to achieve seamless floor-to-ceiling coverage and reduce site joins.
- Curated Finishes: A wide selection of premium melamine finishes to complement any interior color palette or branding identity.
- Custom Groove Patterns: Precision-routed groove line patterns tailored specifically to align with your design narrative.
- This exceptional flexibility empowers architects, interior designers, and specifiers to craft visually striking, custom feature walls that seamlessly align with commercial, retail, and corporate aesthetic goals.

Unleash Creative Freedom with Custom MATCH & Fluted Panels

Ceiling design is no longer just about function—it's about defining the identity of a space. With MATCH Panels and Fluted Panels, complete design customization is entirely within reach. Tailored specifically for modern commercial interiors, these ceiling systems can be personalized with an extensive selection of premium melamine finishes, made-to-order dimensions, and bespoke groove line patterns. Whether you are aiming for subtle architectural texture or a bold, branded feature ceiling, our customizable panels empower architects and designers to bring any interior vision to life with precision and style.
