FLUTED COLLECTION I™

Environmentally friendly panel

wall . ceiling . door . cabinetry . fitment

INTRODUCING

Fluted Collection 1 – Timeless Elegance in Every Detail

Crafted from high-quality **Wood Plastic Composite (WPC)**, Fluted Collection 1 combines durability with refined aesthetics. Finished in premium melamine surfaces, this collection offers a range of sizes and profiles to suit various design applications. Each panel is engineered with a specially designed interlocking tongue, ensuring discreet and secure installation for a seamless appearance. Perfect for creating modern, textured interiors with lasting impact.

FLUTED PANEL – SINGAPORE GREEN BUILDING PRODUCTS

Recognized by the Singapore Green Building Council (SGBC) as certified Singapore Green Building Products (SGBP), **Fluted Collection 1 & 3 and Match Panel** align with Singapore's commitment to sustainable development. The SGBC certification affirms that these products meet stringent criteria for environmental impact, contributing to higher Green Mark scores in green building projects. Whether used in commercial, residential, or institutional environments, these collections offer architects and designers a responsible and visually impactful choice, supporting both creative vision and sustainable building goals.

ADVANTAGES OF FLUTED PANELS

- Timeless Design: Adds elegance and suits both modern and classic interiors.
- Versatile Use: Suitable for walls, ceilings, curve walls, round columns, main doors, hidden doors, front counters, and porch ceilings.
- Low Cost: Offers a premium look at an affordable price point.
- Easy Installation: Lightweight and quick to install, saving time and labour.
- Low Maintenance: Durable, water-resistant, and easy to clean.
- Customisable: Available in a wide range of colours, textures, and finishes.
- Acoustic Benefits: Helps with sound absorption and reduces echo.
- Conceals Imperfections: Ideal for covering uneven surfaces or creating hidden doors.
- Eco-Friendly Options: SGBC-certified panels support green building initiatives.

FLUTED COLLECTION I™

APPLICATION

Wall Panelling

Curve Wall

Bomb Shelter Door

decorative Ceiling

Fluted panels are more than just a wall feature — they are a versatile design element that enhances various parts of an interior space. Beyond standard wall panelling, fluted panels can be creatively applied to decorative ceilings, bringing texture and depth overhead for a refined, cohesive look.

Thanks to their flexibility and modular form, fluted panels can also be adapted to curve walls, adding a smooth, continuous flow to curved surfaces without compromising on style. Additionally, they serve as a practical solution for concealing functional areas — such as bomb shelter doors — by transforming them into seamless hidden doors, maintaining the overall design harmony of the space.

FLUTED COLLECTION I™

Environmentally friendly panel

wall . ceiling . door . cabinetry . fitment

APPLICATION

Front Counter

Round Column

Car Porch Ceiling

Main Door

Fluted panels offer endless possibilities for elevating both interior and exterior design with their sleek, vertical lines and textured elegance. Beyond wall panelling, they are a stylish and functional choice for a wide range of applications.

They make a bold statement when applied to the main door, adding a modern and sophisticated entrance feature. On front counters, fluted panels bring visual rhythm and depth, making reception or service areas instantly stand out with a touch of refined texture.

Thanks to their flexibility, fluted panels are also ideal for wrapping round columns, seamlessly blending structure with style. Even in outdoor settings like the car porch ceiling, fluted panels add a touch of architectural detail that enhances curb appeal while offering durability.

THE PERFECT MATCH

MATCH PANEL

Elevate your interior design with our versatile Match Wall Panels, designed to seamlessly complement our selected Melamine Fluted Wall Panels. Featuring a sleek, flat surface, these panels offer endless possibilities for mixing and matching to create stunning visual effects. Each panel measures **1000mm x 2700mm x 8mm**, providing ample coverage and a perfect fit for various applications.

PVC GRILLE PANEL

PVC Grille Panel is an innovative system of modular vertical and horizontal segments. Thanks to its construction you could make the right modern room divider suitable for your own room. These divider panels are made of PVC Form board material with CNC machine cut out .Size **600mm x 2400mm x 15mm** . With the various colour and veneer melamine.

FLUTED COLLECTION 3

Fluted Collection 3 is designed to seamlessly match and continue the aesthetic flow of **Fluted Collection 1**, offering designers and homeowners greater flexibility in achieving a cohesive interior look. Measuring **W155mm x L2900mm x T25mm**, this panel delivers a striking visual rhythm while maintaining compatibility with Collection 1 for smooth transitions across walls, ceilings, and built-ins. Ideal for feature walls, full-height installations, or to highlight key architectural elements, Fluted Collection 3 elevates interior spaces with a unified and timeless design language.
